

# SCRUM Training: Becoming a Great Product Owner (AGIPO, 2 jours)

---

## Description

The course Becoming a Great Product Owner (SCRUM Training) includes concrete techniques for requirements elicitation & stakeholder management and discusses the creation & maintenance of the Product Backlog in detail. Product Owners are shown how to identify epics, features & sprintable PBIs as they perform backlog grooming. This course shows you how to write great user stories through constant interaction with product stakeholders. SCRUM core concepts are mastered through detailed group discussions & extensive practice exercises that allow you to experience the complete SCRUM lifecycle.
