

# Business Analysis Training: Requirements, Use Cases & Modeling (BA201, 4 jours)

---

## Description

The course Requirements, Use Cases & Modeling (Business Analysis Training) is a complete study of the requirements management roles & responsibilities of a business analyst. The training focusses on techniques for high quality business requirements & use case development in the context of systems development & process engineering. The course covers functional & non-functional requirements, business & system use cases, business process models, BPMN & more. The course concludes with a discussion of the testing and data modeling disciplines in the context of the overall business development lifecycle.

## Tarifs

- Tarification: \$3,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

## Plan de cours

### Business Analysis

---

Overview of Business Analysis  
Business Analysts' Roles and Responsibilities  
Key Requirements Documents  
Preparing the Business Cases  
An Introduction to Project Management  
Use Cases and the Analysis Process  
Management of Requirements and Use Cases  
The Complete Requirements Elicitation Process  
Roles and Expectations of Team Members

### Project Definition and Scoping

---

Choosing a Methodology  
The Rational Unified Process  
The Inception Phase  
The Elaboration Phase  
The Construction Phase  
The Transition Phase  
Agile Development

### Essential Business Skills in Practice

---

Facilitation Techniques  
Negotiation Techniques  
Negotiation and Decision Making: Wielding Power  
Validating and Testing Requirements

### Editing and Validating Requirements in Practice

---

The Requirements Shell  
The Quality Gateway  
Validating and Testing Requirements  
Editing and Rewriting Requirements  
Writing Test Cases  
The Business Requirements Document

### Modeling Requirements in Practice

---

Process Mapping Procedure and Materials

Creating Process Maps

Alternative Graphical Models

Using a Requirement Model Diagram

Gap Analysis

Prioritizing Requirements

Business Process Modeling (BPM) in Practice

---

About BPM Theory

BPM Design Patterns

Basic Patterns

Branch and Join Patterns

Structural Patterns

Multiple Instances Pattern

State Based Patterns

Cancellation Patterns

A Complete Example

Use Cases in Practice

---

Use Cases Revisited: BUCs versus SUCs

Use Case Diagrams

Use Case Formats

Use Case Sections

When Are We Done?

Test Plans, Test Cases and Bug Reports in Practice

---

A Traceability Strategy for the Organization

Testing Types

The Test Plan and Test Cases

Testing Documentation

The Test Design Specification

Writing Test Cases

Test Metrics

About Defects

Preparing Test Summary Documents

Database and Data Flow Modeling

---

Database Normalization

Data Flow Diagrams

Using Data Flow Diagrams
