Cloud Training: Essentials of Cloud Computing for Business (CLOUDI, 2 jours)

Description

The course Essentials of Cloud Computing for Business (Cloud Training) introduces the core concepts of cloud computing and its associated business value. The course introduces the many technologies that can be used to implement a cloud infrastructure and explores the most common issues that arise during an implementation. The training also includes an introduction to the core concepts of IT service management in the cloud and discusses concrete risk and reward management techniques.
