

HTML Training: Mastering HTML Presentation with CSS (CSSPRO, 2 jours)

Description

The course Mastering HTML Presentation with CSS (HTML Training) teaches you how to write modern web pages using HTML5 & CSS. The training includes HTML5 structural elements for the header, content and footer as well as the navbar and side menus. The course discusses the use of links, tables, images and text within a web page. Having built the structure, you learn how to format the page by using CSS styles. The course explores fonts, borders, colors, margins, spacing, positioning & more with CSS.
