

Java Training: GRAILS Development (GRAILS, 4 jours)

Description

The course GRAILS Development (Java Training) covers every aspect of GRAILS based application development. The course begins with the installation and configuration of GRAILS. The training covers Groovy including the Groovy web layer, GSP pages & tags, Filters & GSP custom tags. The course includes an exploration of Groovy ORM, persistence, validation and URL mapping.

Tarifs

- Tarification: \$3,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

Introduction to Grails

Grails Overview

Downloading and Installing Grails

Grails Interactive Mode

Using Grails within an IDE

Supported JEE Containers

Groovy Web Layer

Controllers and Actions

Scopes and Controllers

Models

Views

Chaining and Redirection

Intercepting Controllers

Understanding Command Objects

Groovy Server Pages

GSP Basics

A Simple GSP

Running the GSP Examples

GSP Syntax and Directives

GSP Expressions

Creating Controls

GSP Tags

Scopes and Variables

Filtering and Search Tags

Links and Resources

Tags as Method Calls

Tag Libraries

Scopes and Variables

Simple Tags

Logical Tags

Iterative Tags

Using JSP Tag Libraries

Grails URL Mappings

Mapping to Controllers and Actions

Mapping to Views

Mapping Wildcards

Constraints

Named URL Mappings

Grails Web Flow

Action States and View States

Workflow Execution Events

Flow Scopes

Flow Execution Events

Filters

What is a Filter?

Sample Filter

The Filter API

Initializing Filters

Blocking the Response

Modifying the Response

Running the Examples

Validation

Defining Constraints

Validating Constraints

Applying Validation on the Client

Validation Errors and Globalization

Grails Domain Object Relational Mapping

Getting Started with GORM

Basic CRUD Commands

Modelling Associations

Modelling Composition

Modelling Inheritance

Working with Collections – Sets, Lists and Maps

Object Persistence

Saving and Updating Objects

Deleting Objects

Working with Cascading Settings

Eager and Lazy Fetching Settings

Locking – Optimistic and Pessimistic

Querying

Dynamic Finders

Executing Where Queries

Criteria Queries

Detached Criteria Queries

Securing Web Applications

JEE Security

Securing a Grails Application

Preventing Cross Site Scripting

Encoding and Decoding Objects

Authentication
