

# Change Management Training: Mastering a Process Approach to Change (GWDPR, 2 jours)

---

## Description

The course Getting Work Done with Processes (Change Management Training) is an exploration of process-based change management. You learn to apply process science to organizational change management in complex environments. The training includes the use of processes in the design & execution of effective organizational change and reorganization. The workshop provides opportunities to explore and discuss every aspect of organizational change including culture, people, strategies, techniques and tools. This management level workshop is immersive, effective and efficient.
