

Testing Training: A Complete HP ALM® Course (HPALM, 4 jours)

Description

The course A Complete HP ALM® Course (Testing Training) takes participants through the testing lifecycle from requirements to test case development and execution. Using HP ALM as the tool of choice, every aspect of the testing discipline is discussed as it is seen by HP ALM. The course concludes with a detailed discussion of ALM customization in order to ensure alignment with the target production environment.

Tarifs

- Tarification: \$3,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

Introduction to HP ALM®

What is HP ALM®?
Exploring ALM® Tools and Features
About HP ALM® in a Lifecycle Environment
Preparing the Environment
Installing HP ALM®
Installing HP ALM® Clients
Migrating from Previous Versions

Working with Releases

The Application Life Cycle Management Process
About Releases and Cycles
Working with Release Trees
Requirements, Releases and Cycles

Working with Requirements

Requirements Module
About the Requirements Gathering Process
About Requirement Types
Documenting Requirements
Working with Requirements
Building a Requirements Tree
Viewing, Modifying and Converting Requirements
About Requirements and Releases
About Requirements Traceability
About Requirements and Risks
Working with Cycles: Monitoring and Tracking Progress

Domains and Projects

HP ALM® Overview
Creating Domains and Projects
Enabling Versioning
Creating and Managing Users
