

# Testing Training: Introducing HP Quality Center (HPQC, 3 jours)

---

## Description

The course Introducing HP Quality Center (Testing Training) takes participants through the entire testing lifecycle from requirements to test case development and execution. Using HP Quality Center as the tool of choice, every aspect of the testing discipline is discussed as it is seen by HP Quality Center. The course concludes with a detailed discussion of Quality Center customization in order to ensure alignment with the target production environment.

## Tarifs

- Tarification: \$3,350/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

## Plan de cours

### Working with Releases

---

About Releases and Cycles

Working with Release Trees

Requirements, Releases and Cycles

Managing Tests based on Releases and Cycles

### Working with Requirements

---

About the Requirements Gathering Process

About Requirement Types

Documenting Requirements

Working with Requirements

Building a Requirements Tree

About Requirements and Releases

About Requirements Traceability

About Requirements and Risks

### Domains and Projects

---

HP Quality Center Overview

Understanding the Project Structure

Creating Domains and Projects

Enabling Versioning

Creating and Managing Users

### Testing Fundamentals

---

Test Plans

About Creating Tests

Working with Test Parameters

Working with Test Ccripts

Linking Tests to Requirements

Designing Test Steps

Generating Live Analysis Graphs

### Executing Tests

---

Working with Test Sets

Working with Tests

Automatic versus Manual Tests

About Test Sets, Releases and Cycles

Managing Flow and Dependencies

Working with Test Results

Mastering Version Control

---

The Need for Version Control

About Check-In and Check-Out

Managing Version History

Comparing Multiple Versions

Restoring Older Versions

Defining Libraries and Baselines

Pinning a Test Set to a Baseline

Comparing Baselines

Working with Defects

---

Defect Logging

Defect Retrieval and Analysis

Defect Association

Defect Status Tracking

Customising the Environment

---

Customising Users and Groups

Customising Entities

Customising Lookup Lists

Customising Workflows
