

Testing Training: Mastering HP Quick Test Pro (HPQTPF, 4 jours)

Description

The course Mastering HP Quick Test Pro (Testing Training) focuses on the art, function and application of the testing discipline using a full lifecycle approach with HP QuickTest Pro. Every aspect of the testing activity is discussed including testing fundamentals, test recording, advanced features, database integration, test automation and exception handling. The course ends with a full practical lab that allows participants to apply the skills they have learned to a real-world practical scenario.

Tarifs

- Tarification: \$3,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

Testing Essentials

From Requirements to Test: The Complete Lifecycle

Reviewing Key Documents

The Master Test Plan

The Test Design Specification

The Test Cases

From Documentation to Action: Quick Test Pro

Recording Tests

Reviewing Key Documents

Preparing the Test Environment

Recording a First Test and Understanding the Results

Working with Objects and Object Properties

Working with Synchronization

Working with Checkpoints

Working with Regular Expressions

Using Debugging Tools

Advanced Testing

Working with Parameters: Input and Output

Creating Data Driven Tests

Creating Reusable Actions

Expanding Actions to Multiple Actions

Adding Unrecorded Steps

Working with Objects

Web Application Testing

Web Penetration Testing

Creating Custom Checkpoints

Working with Databases

Creating Database Checkpoints

Working with SQL Queries

Insert a Database checkpoint

About Parameters and Database Queries

Test Automation

VB Script and Quick Test Pro

VBScript Essentials

Working with Data: Importing Data

Retrieving External Data: Databases and Files

Creating a Support Code Library

Mastering Exception Handling

Overview of Error Types

The Mechanics Exception Handling

Using Recovery Scenarios

Handling Exceptions Programmatically

Exception Handling Best Practice

A Full Case Study
