HTML Training: Introduction to HTML5 (HTML5INT, 1 jours)

Description

The course Introduction to HTML5 (HTML Training) provides participants with a solid overview of the changes associated with the HTML5 standard. Starting with document structure changes, the course discusses every aspect of the base HTML5 language including styles, headers, tables, links and images amongst others. Included in the course is a brief discussion of accessibility related considerations as well as the use of the Modernizr and Shiv libraries. Please note that this is a high level overview that does not go into the details of using local storage, the canvas, geolocation, etc..
