

# Leadership Training: Leading in Complex Environments (LEADERIT, 2 jours)

---

## Description

Modern IT projects are some of the most far reaching and complex endeavors that an organization undertakes. Consequently, the professional teams that undertake these projects are sophisticated, highly skilled and diverse. What does it take to lead such a team towards a successful implementation? How can a leader stimulate creativity while keeping the project on track and in compliance with identified requirements and guidelines? This is not a trivial task. The course Leading in Complex Environments (Leadership Training) equips the business professional with leading edge skills and techniques to build, motivate and develop teams in today's complex and technology driven workplace. This workshop will inspire and motivate all those who participate. Whether you are a business executive or a business professional, the SETC certified leadership course will enable you to develop the leader in you.
