

Oracle Training: MySQL Core Administration (MYSQLC, 4 jours)

Description

The course MySQL Core Administration (Oracle Training) :: database course introduces the MySQL Relational Database Management System. Every aspect of MySQL database administration is covered from the creation of relational databases and their tables to the development of powerful SQL scripts to automate primary administrative tasks. This complete course discusses the various security mechanisms that are provided by the MySQL database engine. This course also includes coverage of performance optimization, backup and recovery and indexing amongst others. If you want to implement a MySQL database in your organization, this is the course for you.

Tarifs

- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

RDBMS Essentials

MySQL Relational Database Management System
MySQL Terminology
MySQL Database Terminology
Application Development and MySQL
MySQL OLAP and OLTP
MySQL Tools
The Role of MySQL in the Enterprise
Other MySQL Services

Installing MySQL

MySQL 5.0 Installation Overview
The Server Hardware
Installing MySQL
Configuring MySQL Server

Creating the Database

Data Storage Architecture
Creating/Deleting Database Files
Optimizing Data Storage
Importing Data

SQL Programming for MySQL Administrators

MySQL Data Types
Creating Tables
Retrieving Data: The Basic SELECT Statement
Executing SQL Scripts
Using Built-In Database Functions
System Databases/Tables

MySQL Security/User Account Administration

MySQL Security Overview
Planning Security
Configuring MySQL Server Accounts
Securing the Server
Optimizing Database Integrity

Implementing Database Integrity

Domain Integrity

Entity Integrity: Primary Keys

Referential Integrity: Foreign Keys

Retrieving Table and Database Information

Optimizing Database Maintenance and Performance

Combining/Retrieving Top N Table Data

Table Maintenance

Retrieving Aggregate Data Values

Modifying Data: Inserting/Updating/Deleting

Join Strategies: Selecting From Multiple Tables

Sub-Queries

Creating and Using Functions

User Variables

Stored Procedures

Transactions and Performance

Using Transactions

Transactional Locks and Deadlocks

Indexes

Index Architecture

Planning Indexes

Logging, Backup and Recovery

MySQL Server Logging

Fault Tolerance and MySQL Database Backups

Topic 3: Database Recovery
