

Project Management Training: Blending Theory & Tools (PMBLE, 4 jours)

Description

Project management is the art of guiding a project or process towards successful completion. Today's corporate projects are complex in that they require the effective coordination of large multi-disciplinary teams and the allocation and management of vast resource portfolios. Effective project management is the key to a successful project. The course Blending Theory & Tools (Project Management Training) equips the business professional with leading edge methodologies and practices in the project management field as they are applied with Microsoft Project Pro. Project management is a requirement for professionals in many areas of expertise, with many employers now identifying project management skills as vital to corporate success.
