Server 2022 Training: SCOM Enterprise Configuration & Use (SCOMOVW, 2 jours)

Description

This SETC certified course allows participants to explore the rich functionality of Microsoft SCOM in an enterprise environment. Starting with the essential monitoring functions of SCOM, the course quickly accelerates through the use of common plug-ins and adapters. The course concludes with a complete troubleshooting lab that allows participants to apply the many skills that they have acquired in class. If you need to implement SCOM in your organization, this course will give the essential skills and knowledge to make that happen
