

Scrum Training: Large Scale Scrum for Huge Projects (SCRUMML, 2 jours)

Description

The course Scrum Training: Large Scale Scrum for Huge Projects build upon the principles and practice of the Scrum framework and discusses their application in the context of large projects that require the coordination of many development teams. Starting with a review of Scrum principles, that training discusses the use and adaptation of regular Scrum to large scale Scrum (LeSS). The training course includes everything that you need to know in order to use LeSS to structure the project, manage and design the Product Backlog, perform Release Planning and execute every major Scrum activity from Sprint Planning to the Sprint Retrospective.
