SharePoint Training: Design & Architecture (SPTDARCH, 4 jours)

Description

The course Design & Architecture (SharePoint Training) is detailed exploration of SharePoint design & architecture. Beginning with SharePoint server preparation, the training covers web applications, sites & sub-sites, lists & document libraries, forms, metadata & much more. The course ends with a complete discussion of SharePoint analysis & design from a business requirements perspective.

Tarifs

- Tarification: \$3,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

SharePoint Planning and Installation

The SharePoint User Interface

Planning the Hardware Platform

Software Requirements

SharePoint Capacity Management

SharePoint Server Architecture

Estimating Content Database Storage

SharePoint Service Storage Requirements

Storage, Disks, Memory and Networks

Overview of SQL Server Services

Configuring SQL Server

SharePoint Site Architecture

Creating a SharePoint Site

About Customised and Uncustomised SharePoint Pages

Understanding Web Applications

Creating a Site Collection

Where Sub-Sites Fit In?

Creating and Using Site Lists

The Content-View Separation

Working with Lists

Working with Columns

About Site Content Types and Site Columns

Content Versioning

Content Approval

Data Validation

Creating and Using Views

Referencing External Data

List MetaData

Knowing List Content Limitations

Creating and Using Site Libraries

SharePoint Libraries

Content Versioning and Content Approval

The Document Library

Check-In and Check-Out
About Document Metadata
The Form Library and InfoPath
Customizing Site Pages and Using Web Parts
Creating a Web Pages
Working with Web Content
Web Parts
Minimizing, Closing and Deleting Web Parts
Editing Web Part Properties
Document Publishing Infra-Structure
SharePoint Security
The Technology of Security
The SharePoint Security Model
Permission Levels
SharePoint Groups
SharePoint Users
SharePoint Workflows
SharePoint 2007 Workflows Overview
SharePoint Workflow Essentials
Using Out-of-the-Box Workflows in SharePoint 2007
Adding a Workflow to Document Library
SharePoint Integration
About SQL Server Reporting Services Integration
About Project Server Integration
About BizTalk Integration
About TFS Integration
An Open Discussion on SharePoint Integration
Chara Doint Infragt musture Degran
SharePoint Infrastructure Design
Designing the Solution
Designing the Solution Creating SharePoint Containers Creating Workflow Associations
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Services
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Services Architecture and Design
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Services Architecture and Design Getting to Know the Business
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Services Architecture and Design Getting to Know the Business Functional and Non-Functional Requirements: Creating a Business 234
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Service Other Services Architecture and Design Getting to Know the Business Functional and Non-Functional Requirements: Creating a Business 234 Understanding and Documenting Processes: Using BPMN
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Service Architecture and Design Getting to Know the Business Functional and Non-Functional Requirements: Creating a Business 234 Understanding and Documenting Processes: Using BPMN Creating a Technical Specification
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Service Other Services Architecture and Design Getting to Know the Business Functional and Non-Functional Requirements: Creating a Business 234 Understanding and Documenting Processes: Using BPMN Creating a Technical Specification Creating Fully Dressed Use Cases
Designing the Solution Creating SharePoint Containers Creating Workflow Associations Creating Custom Workflows SharePoint Installation Overview Preparing for the Installation Installing the Product Configuring Services The Search Service Other Services Architecture and Design Getting to Know the Business Functional and Non-Functional Requirements: Creating a Business 234 Understanding and Documenting Processes: Using BPMN Creating a Technical Specification Creating Fully Dressed Use Cases Planning the Topology
