

SharePoint Training: Creating & Managing Web Portals (SPTDESIGN, 4 jours)

Description

The course Creating & Managing Web Portals (SharePoint Training) is an exploration of the SharePoint site creation, customization & development using SharePoint Designer. You learn how to create SharePoint site elements and how to customize & enhance SharePoint look & feel using SharePoint Designer. The training includes the creation of lists, libraries, content types, custom site templates & styles, workflows, custom web parts and features & fields amongst others. The course also covers ASP .NET web forms development if time permits.
