

VMWare Training: Advanced Virtualiation Technologies

(VMWAREOVW, 1 jours)

Description

This SETC workshop presents the power of VMWare virtualization in the context of hardware and software consolidation strategies. Beginning with the installation and use of VCenter, the course provides a detailed study of virtual storage and virtual networking. If you want to learn how to implement VCenter to consolidate your server infrastructure, this is the workshop for you.

Tarifs

- Tarification: \$850/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

Plan de cours

VMware vCenter Server	
vCenter Server Architecture	
vCenter Server Appliance	
Configuring and Managing vCenter Server Appliance	
Manage vCenter Server Inventories and Licenses	
VMware Virtual Networks	
Exploring the Standard Virtual Switch	
Creating and Managing Standard Virtual Switches	
Exploring and Modifying Standard Virtual Switch Properties	
Configuring Virtual Switch Load-Balancing	
VMware Virtual Storage	
Exploring Storage Protocols and Device Names	
Configuring ESXi with iSCSI, NFS and Fiber Channel Storage	
Creating and Managing vSphere Datastores	
Deploying and Managing the VMware vSphere Storage Appliance
