

# IIS Training: IIS Design & Implementation (W8IIS, 3 jours)

---

## Description

The course IIS Design & Implementation (IIS Training) is a detailed exploration of the IIS we server. The training covers IIS installation & configuration and includes web site creation & configuration. The course discusses application pools, web server security, .NET integration, .NET Core configuration, .NET application configuration, MIME Types, content compression, IIS modules & more. If you need to install & manage IIS, this is the training course for you.

## Tarifs

- Tarification: \$2,750/person
- Rabais de 10% lorsque vous inscrivez 3 personnes.

## Plan de cours

### IIS Architecture

---

Overview of New Features

Modular Web Server: From the Core Out

New Administration Tools

.NET Integration: IIS 6 versus IIS 7

IIS and Web Services

Application Configuration

### Installation and Configuration

---

Preparing the Server

Installing IIS

Configuring IIS

Advanced Configuration Options

About Logging and Monitoring

### IIS and .NET

---

The .NET Framework

Assemblies and Namespaces

IIS and ASP.NET

IIS Administration Namespace

Application Configuration and Deployment

IIS Automation

### Hosting .NET Applications

---

About Hosting .NET Applications

Supported Runtime Versions

Configuring the Server to Host Multiple .NET Runtimes

Configuring Security Requirements

Configuring ASP .NET 1.1 Applications

Configuring ASP .NET 2.0 Applications

### Security

---

.NET Security Overview

IIS 7 Security Architecture

IIS 7 Security in a .NET World

About Minimizing Threats

IIS Security Checklist

Diagnostics, Performance and Backward Compatibility

---

Diagnostics Overview

Diagnosing Errors without Debugging

Improved Performance

Monitoring Performance

Backward Compatibility

Documentation Sources
